

Rod Strange, Signal Integrity Engineer

Rod Strange, SI Engineer BSEE, MSEE, and BS Psychology

Holds one patent and is a registered engineer (PE)

1976 – 1992 Design engineer
1992 – 2014 SI Consultant, Fast Edges
2014 – 2017 SI Manager Teraspeed Consulting
2018 – present SI Consultant, Fast Edges

Over 25 years of experience as a SI engineer. 7 years as SI consultant for Intel. Intel contracted Rod to write a SI class for their engineers. Since then presented the SI class to more than 100 companies throughout the world.

Companies include Nokia (lived in Finland), Lucent (US, Europe, Brazil), IBM, Philips, Tektronix, Boeing, Rockwell, Dell, HP, Motorola, Samsung (Korea), Siemens, NSA, BAE Systems, Barco, Northrop Grumman, Intel, RIM, EADS, etc.

Testimonials

"I had attended your recent course at our Philips, Semiconductors site. I have found this to be one of the best training courses I have attended (and believe me I have attended quite a few). The presentation style, material and making use of real life examples made this much more informative and useful."

"I have personally attended Rod's class and it was the best SI class I have ever attended, as an electrical engineer I actually grasp the concepts better than the mathematical/textbook approaches that Dr Johnson teaches. This is the best class for non-experts. It covers the SI concepts in a way that any board designer or engineer could understand SI to a level that they could recommend routing solutions to the PhD!"

"Thanks - No! MANY THANKS for one of the best courses I have ever been on. It has to be a major milestone" Patrick

"Easily the best course/training I have ever been. Thank you" Finland
